

# Thermal Phase Change Material That Applies Easier Than A Postage Stamp.

**Bergquist Hi-Flow® Phase Change eliminates grease, goes on smooth to provide low thermal resistance.**

Improve productivity by eliminating thermal grease using Hi-Flow®, the easiest-to-apply Phase Change Material on the market. Hi-Flow's industry-leading thermal performance provides a low thermal resistance path between hot components and heat sinks, ensuring power devices, chip sets, CPU's or sensitive electronics reliability.

Bergquist's family of Hi-Flow Phase Change Materials can be ordered with or without tabs for ease of assembly operation. Hi-Flow is also available in a re-workable version meeting market demand for repair and burn-in applications. Hi-Flow configurations include:

- Dry or "tackified"
- Aluminum, insulating film, or fiberglass carriers
- Variety of thickness and size options
- Bulk compound
- Dispenser availability from Bergquist
