

AN ORIGINAL NEVER CRUMBLES.

Unlike Imitations, Bergquist's Gap Pad[®] S-Class Stays Soft While Providing Superior Thermal Performance.

Gap Pad S-Class stays soft. It doesn't flake, tear or crumble for easy application.

Say good-bye to crumbling, oily gap fillers for good. Bergquist's super-soft Gap Pad S-Class thermally conductive gap filling materials conform to demanding contours while maintaining structural

integrity and applying little or no stress to fragile components. In addition, S-Class' natural inherent tack provides more stable release characteristics, making it cleaner and easier to handle in the application assembly process.

Three Gap Pad S-Class solutions providing exceptional softness, thermal performance and ease of handling.

Maximize thermal performance with Gap Pad S-Class.

S-Class materials provide high thermal conductivity for exceptionally low thermal resistance at ultra-low mounting pressures – our best thermal performance material yet. The elastic nature of the material also provides excellent interfacing and wet-out performance. And because of its natural inherent tack, S-Class eliminates the need for

additional adhesive layers that can increase interfacial resistance and inhibit thermal performance.

FREE sample kit and S-Cap.

Visit our web site or call today to qualify for your FREE S-Class sample kit and S-Cap.
