

The Greatest Line of Thermal Products No Matter Where You Hang Out.

Hi-Flow

Gap Pad

Thermal Clad

Bond-Ply

Sil-Pad

Custom

Where innovation meets choice.

Hanging out in higher watt density applications? Or are your components overheating with less space? Whether you're taking an existing component and squeezing into smaller space, or working with a new high speed microchip, our products won't pin you down.

Performance possibilities from the global leader.

Bergquist is a world leader in thermal management products with some of the best-known brands in the business. Brands like Sil-Pad® thermally-conductive interface materials, Gap Pad® electrically insulating and non-insulating gap fillers, Hi-Flow® "phase change" grease replacement materials, Bond-Ply® Thermally-conductive adhesive tapes, and Thermal Clad® insulated metal substrates for high power surface-mount applications.

Over 200 thermal solutions and growing.

Bergquist product depth and new innovation is a great place to be.

- 5 major thermal lines to select from
- 42 available thermal conductivity levels
- 247 different thicknesses
- 1000's of die-cut configurations

That gives you real selection to work with. If you don't find an existing product, our engineers can customize a new solution to meet your specific application needs.

Contact us today for your FREE* Master Sample Kit.

This master sample kit contains 42 different thermal interface materials. Includes new, comprehensive 76-page Selection Guide.
