

A WAY WITH HEAT

THE BERGQUIST WAY

Designing electronic circuits is a demanding task. But cool down and let The Bergquist Company take the heat.

25 years of materials science innovation has resulted in the development of a wide range of leading thermal management solutions suitable for virtually any application.

Take a look at how the Gap Pad™, Gap Filler, Sil-pad®, Hi-Flow™ and Thermal Clad® product families have a way with heat. Robust, reliable and efficient products to keep your designs cool.

Choose the supplier that supplies the right solution – choose Bergquist, the proven leader in innovative thermal management.
