

A WAY WITH HEAT

THE GAP PAD WAY

Designing electronic circuits is a demanding task. But cool down and let The Bergquist Company take the heat.

Let The Bergquist Company keep you cool with Gap Pad™, the most efficient thermally conductive material of its kind available. By filling the air gaps between a printed circuit board and a chassis or heat sink, Gap Pad provides a highly efficient thermal transfer.

Gap Pad from The Bergquist Company is one of a wide range of outstanding thermal management solutions suitable for virtually any application. Its innovations in materials science have kept it number one for 25 years.

Choose the supplier that supplies the right solution – choose Bergquist, the proven market leader in innovative thermal management.
